CORPORATE SOCIAL RESPONSIBILITY AMBITIONS 2030

- Regional sourcing is standard
- Sustainable relations

- Less pollution every year
- Growth ambition organic beers

Meura Stream Green

- Wort preheater on superheated brewing water
- Wort formation 0,5-1% evap
- Wort stripper 0,5% evap
- Wort cooling very hot water booster

→ Reduction energy consumption 75%

Heating mash tun = Clean Steam + superheated brewing water injection

- → Low temperature heating = heat pump
- → Reduction of heat pump peak capacity & investment

Meura fine grist mash filter

- → Year-to-year variability of regional barley malt
- → Processing unmalted regional organic alternative cereals

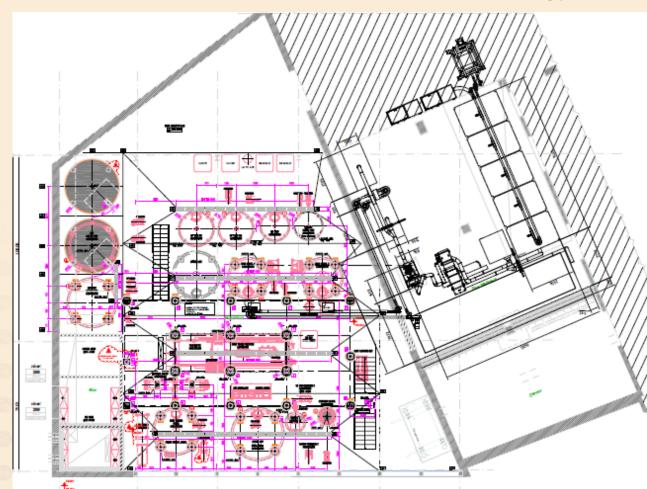

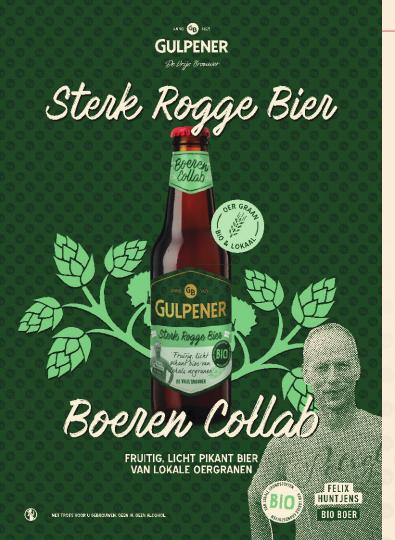

Phase II – heat pump

- Sustainable electric power
- 100% natural refrigerants no halogens
- Cooling heat output = brewhouse heat input

Lessons learned

- Select the right project partners
- Challenge your partners – hard!
